# Thank You for Shopping Progressive Grower!

We encourage you to submit your orders two weeks before pickup or ship date to allow us time to process and pack your order. We reserve the right to pro-rate any items in short supply. Please pick up orders no later than the month after ordering. Orders left after 30 days will be subject to available supply and price.

Upon receiving your order please inspect it immediately and report any error, shortage, or damage within 3 days. Progressive Grower is not responsible for shortages reported more than 3 days after receipt.

Returns: Saleable products may be returned with permission and may be subject to handling charges based on the condition and time of return for seasonal products. Expired products, fertilizers, seeds, special order, and non-stock items are not returnable.

Credit Invoices: In the case of overpayments, cancellations, shortages, returns, defective products, etc. credit invoices will be issued. Credit invoices not used will be mailed annually.

All prices are FOB West Wareham, MA or Riverhead, NY (except items with indicated FOB point) and are subject to change without notice.

*Contact us for pricing discounts on large quantity orders.*

## 2025 PRE-ORDER GUIDE

## A Letter to Our Customers

We really appreciate your business and hope that our service meets your expectations. Since 2020 we have seen a myriad of challenges in our industry. For 2024, we are expecting fertilizer pricing to continue to rise, as well as most of your other needed supplies, to be on the increase. We encourage you to use this catalog as a handbook for placing your orders with the understanding that stock availability is ever-changing and the prices may change with no notice. As always, we will need as much notice as possible to prepare orders and schedule deliveries. We encourage you to order prior to the end of the year for the best pricing.

If you have any questions about inventory or prices, please contact us at **844.357.6617** or **info@progressivegrower.com**.

Sincerely,

All of us at Progressive Grower

While we do our best to research all of our products for use by organic growers, it is the responsibility of the farmer to determine if they pass USDA organic requirements before purchasing and using them. Some products that have OMRI or Nat'l List status can lose that standing at any time without notice. We are not responsible for products purchased that can not be used in certified OG operations. Check with your certifying agency for current status of a product. Not all of the products that we sell are registered in every state. It is your responsibility to comply with the laws of your state. Please check with your state department of agriculture if you are unsure.

## TWO-WHEEL TRACTORS

### HARVESTER 722 RECOIL

The Harvester 722 is a popular model from BCS, suitable for those seeking a combination of performance and versatility. It is powered by a Honda GX240 engine and has two forward and reverse speeds, with an additional third transport speed in rear-mount attachment mode. It can accommodate various attachments, including a 26" Rear-Tine Tiller, 45" Sickle Bar Mower, Chipper/Shredder, Log Splitter, and Dozer Blade. However, it is not ideal for brush mowing due to its lack of third working speed and Differential Drive. Battery is not included.

- Easy-to-engage, shuttle-type reverse
- Anti-vibe handlebars that instantly adjust both vertically and side-to-side
- Fast transport speed
- Roto Tiller not included

DESCRIPTION	PRICE
HARVESTER 722 RECOIL	\$3,749.00

### PROFESSIONAL SERIES POWERSAFE

The PowerSafe 739 lawn mower has three working speeds and is maneuverable. It comes with a Honda GX340 engine and a hydro-mechanical "wet" clutch for better performance and smoother shifting. The PowerSafe clutch ensures safer operation and immediate stoppage when the clutch lever is released. It does not have a transport speed and is backed by a five-year warranty for non-commercial users.

- Differential Drive with Lockout
- PowerSafe clutch for longer life and smoother operation
- Separate control to turn the engine off
- Battery not included for electric start tractors
- Roto Tiller not included
- Three working speeds in both directions
- Stops power to the implement when the safety lever is released without shutting down the engine

DESCRIPTION	PRICE
739 RECOIL	\$5,269.00
739 ELECTRIC START	\$5,669.00

### 732 MODEL (PS)

The BCS Model 732 is an economical tractor with Differential Drive and more features, horsepower, and versatility than straight axle models. It is powered by Kohler's Command Pro CH395 engine and can accommodate various attachments, including a 26" tiller, 26" rotary plow, and 53" sickle bar mower.

- Differential Drive with Lockout
- Double cone clutch
- All gear drive
- Convenient shuttle-style forward/reverse

DESCRIPTION	PRICE
RECOIL	\$4,149.00
ELECTRIC START	\$4,499.00

### MODEL 853 PROFESSIONAL SERIES

The BCS 853 tractor is versatile with a Honda GX390 engine, offering a third working speed and a fourth transport speed. It has sufficient horsepower for all BCS implements and can accommodate transport attachments like the utility trailer. The tractor features individual wheel brakes and standard Differential Drive with Lockout for increased maneuverability. However, the transport speed is only available in rear-mount mode.

- Fast transport speed for all rear-mount attachments
- Individual wheel brakes for turning and parking.
- Anti-vibe handlebars that instantly adjust both vertically and side-to-side
- Roto Tiller not included
- Differential Drive with Lockout
- Easy-to-engage, shuttle-type reverse
- Battery not included for electric start tractors

DESCRIPTION	PRICE
BCS RECOIL	\$5,999
ELECTRIC START	\$6,499

## BCS TRACTOR ATTACHMENTS

### REAR TINE TILLER ATTACHMENT

- Tines rotate 50% faster than competitive brands at a rate of 20 rotations per wheel revolution.
- Tine speed can also be adjusted to a 10:1 rotation ratio when in second gear.
- A planar wedge in the center of the tiller breaks up the center soil, leaving no un-tilled strip down the middle
- Tine disconnect with lockout stops tines from spinning during transport or when in reverse for safe operation.
- Four tine depth settings, maximum of 8" tilled depth
- Replacement tine kits available

### 320 POWER HARROW

The Power Harrow is the preferred seedbed preparation tool by many market gardeners. While The traditional BCS Rear-Tine Tiller mixes the soil with its vertically rotating tines, and the Power Harrow's knives turn horizontally, stirring the soil like an eggbeater.

- It helps preserve soil structure by creating a larger particle size than that produced by the tiller.
- Reduces weed seed germination by not bringing a new generation of seeds to the surface
- Gently levels and compacts the bed with its metal mesh roller

Now featuring the exclusive adjusting "Josephine" lever, the Power Harrow is easy to turn at the end of rows. The easy-to-use lever lets the operator quickly reach the transport position at the end of the row. After the turn, the desired depth is re-established by returning the lever handle to its previous notch. The Power Harrow's tine depth can be easily adjusted from 0 inches to 5 inches and also includes an integrated tang at the PTO connection point. The integrated tang has a wider bolt hole for the female tractor bushing, which provides a side-to-side "float" on uneven terrain. The gentle compaction of the mesh roller improves the performance of mechanical seeders. The roller also benefits the landscape industry by leveling uneven ground.

**Required Accessory:** *Bumper Weight Kit for easier turning at the end of the row. A Quick Hitch Bushing is required.*

### 360 ROTARY PLOW

This unique attachment is world-renowned for its superior performance, versatility, and easy handling. Designed in Italy and nicknamed the "Groundblaster," the Rotary Plow accomplishes many tasks efficiently and effectively.

Four spiral blades spin at 290 RPMs on a vertical shaft, digging effortlessly into all types of soil — including hardened, rock-filled dirt that has yet to be broken. Debris is discharged to the right side, allowing the operator to build raised beds with multiple passes. The Rotary Plow engages the ground up to 12" deep and can be regulated by a depth wheel that provides easy transportation. The Rotary Plow can accomplish these tasks and more:

- Break new ground
- Create drainage ditches
- Power compost cover crops
- Power hilling
- Build raised beds
- Required Accessory: Wheel Extensions

## WATER WHEEL TRANSPLANTERS

Water Wheel Transplanter passes over a completed plastic mulch bed (performs equally well in raised or flatbed applications) planting wheel punches and waters the hole completely, and allows the operators, riding in a comfortable position, to place a plug, potted or bare root plant directly into the watered hole. Plant mortality is kept extremely minimal.

**COMPACT DESIGN allows closer row centers, shorter turns & increases water & tray carrying capacities of a smaller tractor.**

Floating water wheel bracket, plant up to 3 rows (1-2 standard) per bed, Optional 3 wheel plumbing for 3 rows. Standard racks allow a total carrying capacity of 19 standard 1020 trays. Twenty-five trays with optional second top rack. Fully adjustable, comfortable high back cushioned seats with footrests for greater operator efficiency. The tank has a shut-off valve that can be reached by the planter personnel. Water flow into planter wheels can be adjusted independently.

**Model P1500**

Pull-type with large transport wheels. It converts easily to a 3-point hookup by pulling 3 pins and dropping the hitch. Has an adjustable turnbuckle on the hitch for easy leveling. Used tires with new rims. Steel wheels are optional. 150-gallon tank.

**Model P150 3-point Hookup:**

3-Point allows for a tighter turn radius at the end of the row. Cat 1 & 2 lift pins. Requires tractor with a lift capacity of almost 3000 lbs. 40-80 hp, 4WD, or loader help. 150-gallon tank.

## SUPER DELUXE FLATBED MULCHLAYER

Model SL43 with optional Drip Attachment

Model SL5450 Combination Sweet Corn Model

### TOP OF THE LINE SUPER DELUXE MULCH LAYERS FEATURE:

Heavy-duty spring-loaded drag gives a smooth, pressed seed bed and eliminates potholes. Furrow openers on the bottom of the drag give a consistent depth furrow and can't be pushed out of line by rocks.

High-speed dirt shields. Drag is easy to remove for laying clear plastic over the top of planted sweet corn or raised beds.

The adjustable spring tension on a plastic roll, 3" roller, and 16" rubber tire press wheels keep plastic under constant pressure resulting in uniform and tightly laid mulch.

The cover disks are independently spring-loaded and are fully adjustable. Extra roll carrier enables the machine to carry 2-4000' roll of plastic mulch

### COMBINATION MODEL

Pull type with large transport wheels converts easily to 3 Pt Hookup by pulling 3 pins and removing the hitch. Spring-assisted lever makes it easy to raise and lower the machine by hand when using it as a pull type. With used rubber tires and new rims. Steel transport wheels are optional for additional \$65.00

## WIZARD VACUUM PLANTER

Wizard seed planters are highly user-friendly vacuum seeders with easy seed plate changes, spacing and depth adjustment, and crop changes without tools. The A30 steering handle is adjustable with a safety advancement lever, and the pneumatic drive wheels make transportation between fields easy. Spacing transmission and shoe height adjustment are easily accessible, and seed clean-up is made convenient by a plug at the bottom of the seed hopper. Wizard is one of the most user-friendly precision seed planters available.

Being self-propelled, the Wizard A series seeder is able to cover a lot of ground in a short amount of time. Planting upwards of 2 acres per day is possible with a single operator. Precision planting a wide range of seed sizes sets Wizard apart from similarly priced vacuum seeders which handle either small seeds or large seeds, but not both. Reasonably priced models means smaller operations, hobby farmers, research growers, etc. can now afford the precision vacuum seeding previously exclusive to large-scale commercial growers.

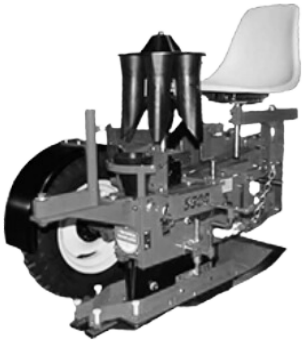

Ideal for planting in greenhouses or open field, Wizard planters are uniquely suited to plant small and large size seeds. The same Wizard seeder can plant small seed crops like carrots, onions, tomato, etc., up to larger seed crops like corn, beans, peas, etc.

Wizard A series units are equipped with a seed bed leveling plate that smooths the soil ahead of the shoe/coulter, assuring more accurate depth control. Row units can be spaced as close as 9.84" (25cm) apart.

## CARROUSEL TYPE TRANSPLANTER

### MODEL 5500

The Model 5500 is the most advanced planter available today. A new cam activated plant ejection system, six cup feeder, adjustable shoe and easy adjust patented ski system to eliminate the packing wheels, makes the Model 5500 the fastest and easiest-to-use transplanter on the market.

#### Features

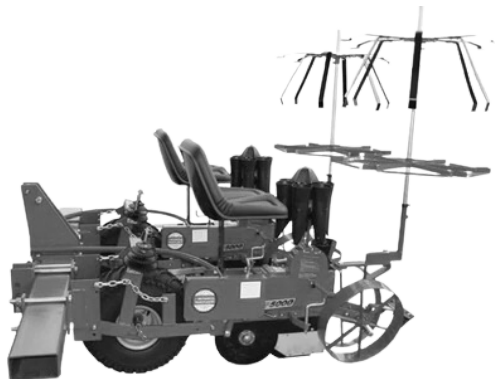

- Movable seats and foot mounts offer rows as narrow as 12". Cam-activated plant ejection eliminates timing requirements and increases speeds
- New adjustable shoe that uses one bolt to easily adjust the shoe width to make it fit most cell sizes
- Easy ski adjustment for quick change "on the go" depth control for any cell size
- Smaller diameter 6-cup feeder increases speed and operator efficiency and has no gaps or spaces for plants to fall between
- Operators weight situated over the toolbar, not the planter
- All planters are driven with our EZ17 drive system for quick change spacing

### MODEL 5500W SERIES - PACKING WHEEL TRANSPLANTERS

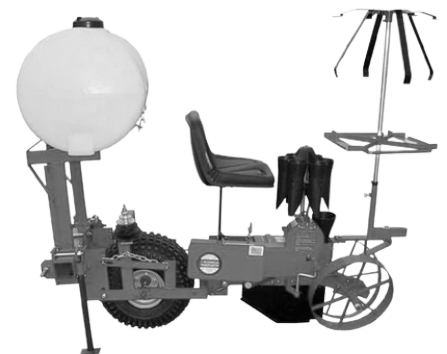

The Model 5500W is the base model 5500 with packing wheels for use in no-till, river bottoms or muck conditions. It has all the features of our 5500W planter with our patented float wheel drive system to drive the planter and prepare the soil. Above are shown with optional cushion seats. The 5500WD 2 comes with barrels and barrel mountings (not shown) and is equipped with an optional poly double disc shoe and six tray carousel.

## ALUMINUM HARVEST CONVEYOR

Aluminum conveyor designed for harvesting vegetables. Including, but not limited to: melons, sweet corn, pumpkins, broccoli, cabbage, and cauliflower. Here are the features that make this conveyor great for the grower that loads directly out of the field:

- Great for packing bins, boxes, or loose on the wagon.
- Mounts right or left and anywhere from front to rear on a regular farm wagon.
- The stand is 16" high and sits on one edge of the wagon. Opposite end clamps to the wagon with a c-clamp attached to a pulley.
- AHC28 has a 3-1/2' long receiving and grading table. 10" wide picking belt with cleats on every foot. The belt travels approximately 50 feet per minute with the tractor at idle. It has a bypass valve and plumbing to stop or slow the belt.
- The bottom belt return track with UHMW strips is standard.
- Easily put on or taken off.
- AHC28 includes a slow-speed high torque hydraulic motor with two 20' long 3/8" hydraulic hoses.
- \* Painted aluminum side prevents discoloration of produce upon contact with the side.

Brusher

### Optional Equipment:

- DROP LID - Removable lid in receiving tables allows produce to fall directly into crates, boxes or bins.

## NAANDAN JAIN® FOGGERS/MISTERS

Performance Micro-Sprinklers and Sprayers are commonly used for propagation, cooling, and humidification in greenhouses. Contact us for design information.

Recommended Pressure: 35-45 PSI.

One fogger should be used for every 2.5 square feet. The cross with four foggers will cover up to 10 square feet (3 – 4 feet wide).

Foggers should be installed at a height of 3 – 5 feet above the propagation material.

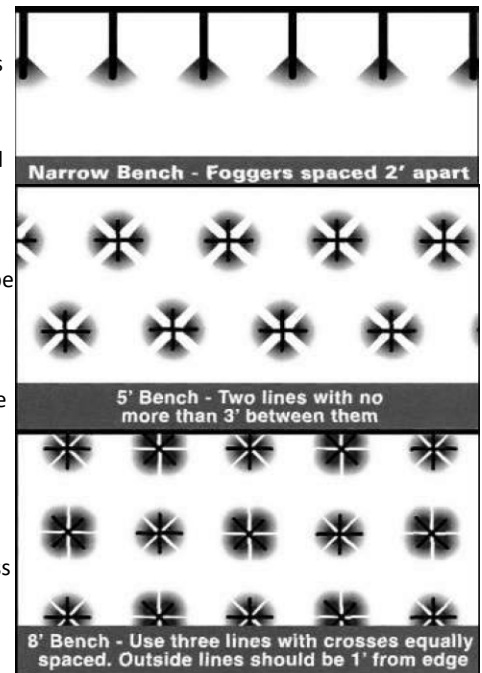

The spacing between the fogger assemblies should be 3 feet. Multiple flow rates available for different precipitation rates.

**3'-4' Bench:** One line above the center.

**6'-7' Bench:** Two lines with crosses are required.

To prevent dry edges on a single bench (no other benches within 2') the cross should not be further than 1' from the edge. In some instances two lines may be required on a 4' bench.

## SENNINGER® XCEL-WOBBLERS

The Xcel-Wobbler uses Senninger's offcenter rotary-action technology. It provides an extremely uniform and instantaneous application pattern over a large area at lower pressures, and with very low evaporative loss and wind drift. Wobblers are designed for nursery irrigation and frost protection. Wobblers installed in test bed withstood winds up to 25 MPH and temperatures as low as 18°. They are an excellent sprinkler for small diameters from 35 to 56 feet. The Xcel has less vibration than earlier models.

Connection: 1/1" MPT. Operating Pressures: 10 - 25 PSI. Space and stagger these sprinklers at 30% less than listed dia. for uniform coverage.

## KOOL RAY CLASSIC SHADE, 1 GALLON

Concentrated liquid shade. The common dilution rate is 1 part to 8 parts water, which reduces light transmission by 31%. A 1:3 ratio reduces light by 45%. A 1:1 ratio reduces glare by 65%. One gallon of solution covers 175 sq. ft. Can be applied by brush, roller, or spray, but works best when spray is applied. Usually applied in spring or summer, then during the course of the year, the shading will slowly wear off for increased light levels as the daylight increases. Frost will also loosen shade. Keep product from freezing.

## AGRITAPE HEAT MAT SYSTEM

The Agritape system includes a control unit, Agritape Heat Mat, and grounding screen that regulates soil temperature and safely grounds the current if the tape is damaged. The system doesn't work with GFCI outlets and uses black bars to create a continuous heat pattern. To install, place the mat and cover it with the ground screen, connect the ground wire from the control unit to the screen, and put the sensor in the soil of the seed tray or container. The Agritape can increase soil temperature up to 20°F above room temperature.

**Control Units:** Multi-outlet power strips can be used to add mats to a controller, however, DO NOT exceed amp rating or max amp of tape.

ITEM	DESCRIPTION	PRICE
11150	Digital Control, 1 outlet, digital thermostat. Max: 50 sq. ft. of heat mats. Rated 8.5 amps.	\$78.95

## TYPICAL DRIP SYSTEM LAYOUT

1. Pump
2. Pressure Relief Valve and/or Switch
4. Check Valve often installed on the pump or fertilizer injector
- 5 Fertilizer Injector, MIC is the best choice for most fields
7. Pressure Gauges installed on filter or fertilizer injectors
8. Screen filter for clean well, Sand Filter for surface water.
10. Mainline, often SDR26 Underground or Layflat
11. Pressure Regulators, pump throttle, and/or zone size used
12. Gate Valve, not required if using valves on drip tape connectors
13. Submain, Oval Hose or Flatube is the best choice.
14. Drip Tape Laterals.
15. Drip Tape Connectors, Numerous types available
16. Drip End Sleeves, Automatic flush valves or knotted.

## MIXRITE PROPORTIONAL INJECTOR, 11 GPM

This fixed ratio 1:100 offers an alternative to the Chemilizer with similar specifications. This proportional fertilizer injector automatically compensates for any change in water pressure or flow to provide a constant mix at 1:100 rate. **Standard pump:** fixed ratio 1:100. **Flow Rate:** 10.2-660 gph (0.17-11 gpm) **Operating Pressure:** 6-120 psi.

**Connections:** " male thread.

**Also available upon request:** 22 GPM, 45 GPM and 110 GPM units.

## MixRite®

12694	Cart Unit: Includes MixRite, bypass, 6 gal. tank, and push cart.	\$495.00

## CHEMILIZER PROPORTIONAL INJECTOR, 11 GPM

The big advantage of this unit is that the chemical pump takes all the abuse of the chemicals and is easy to disassemble or replace by hand. Parts are inexpensive, too. Any chemicals never contaminate the water-powered motor and comes with a 2-year warranty. This proportional fertilizer injector automatically compensates for any change in water pressure or flow, providing a constant mix at a 1:100 rate.

**Max Temperature:** 100° F

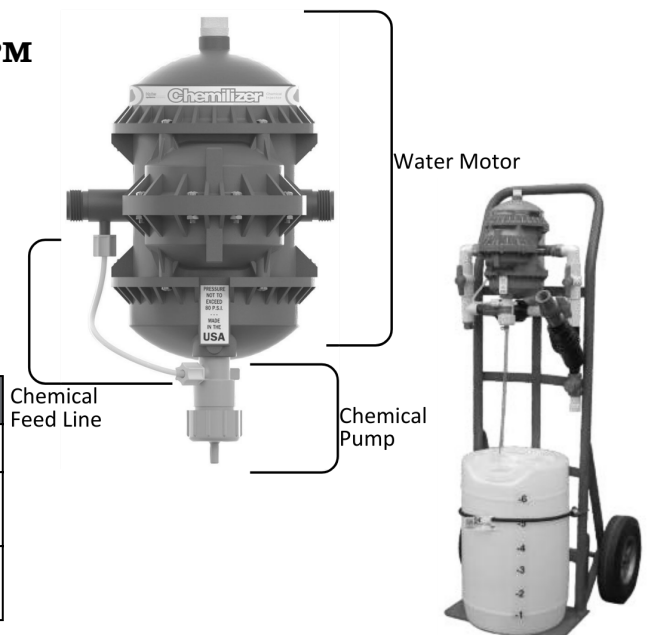

**Standard pump:** fixed ratio 1:100.

**Flow Rate:** 1.2-660 gph (0.02-11 gpm)

**Operating Pressure:** 3- 85 psi.

**Connections:** 3/4" male hose thread.

## MIXRITE TF-5 SERIES FERTILIZER INJECTOR

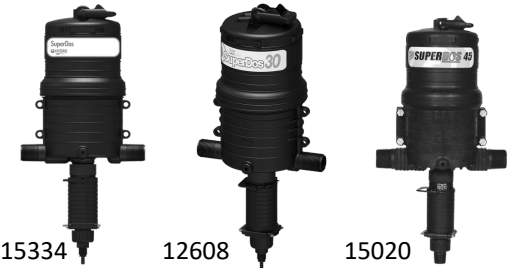

Mixrite TF-5 injectors are positive displacement water driven injectors. No electricity needed. There is constant concentration of additive no matter what pressure and flow. The solution is added in proportion to the water flow for accuracy. The TF models have adjustable injection rates.

TF-5 is a low to medium flow unit used for fertilizers, pesticides and other additives for farming and irrigation. Not intended for strong acids and alkalis or solvents. Flow rates of .88 - 22 GPM. The TF-5 has 1" MPT inlet/outlet connections. Providing higher flow rates, less friction loss and longer life than comparable models.

## DOSMATIC SUPERDOS 45 FERTILIZER INJECTORS

SuperDos operates without electricity to precisely inject liquid concentrates into a water supply line using fluid flow as the power source. SuperDos is designed with a patented internal mixing chamber that promotes homogeneous mixing while segregating harsh chemicals from critical internal components. These proportional fertilizer injectors automatically compensate for any change in water pressure or flow and provide a constant mix at the rate you set—replacement parts in stock. We service in store.

## DOSATRON® PROPORTIONAL INJECTOR

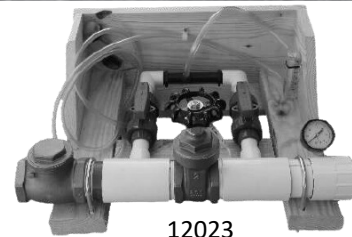

Dosatron® has served the horticulture industry for over 35 years and has established itself as the industry standard. Durable and reliable, these units come with common wear parts included. These water-powered proportional fertilizer injectors automatically compensate for any water pressure or flow change and provide a constant mix at the rate you set. The ratio is easy to adjust by hand with the lock to ensure your setting isn't changed accidentally—ideal for fertilizers, fungicides, acids and more.

## TROUBLE FREE INJECTION OF FERTILIZERS

Mazzei injectors are high-efficiency, Venturi-type differential pressure injectors that use suction to inject and mix fertilizers and water treatment chemicals into water. They have no moving parts, are molded from chemical-resistant polypropylene, and have a long life.

Mazzei non-proportional injectors work well for drip systems in fields or high tunnels, as long as fertilizer is based on rate per acre instead of PPM. Mix the required amount of fertilizer in approximately 5 gallons of water, based on lb./acre per week divided by the number of weekly applications.

**Instructions for fertilizer injection during irrigation:** mix and re-mix fertilizer, start irrigation, stabilize pressure, open PVC bypass valves, adjust brass valve until desired injection rate is reached. Water pressure may drop, and irrigation should continue until all fertilizer is out of the system. If not working, check for clogs, ensure minimum flow rate is met, and check for suction leaks or incorrect installation.

## BLUELINE® PC PRESSURE COMPENSATING DRIPLINE

### 18MM (1/2") Orchard Tubing with Built-In Emitters

BlueLine™ PC is a tubing system that features a built-in emitter welded to the inside wall of the tubing, providing constant discharge over a pressure range of 15-60 PSI. This one-piece construction eliminates the need for hole punching and handling damage, and reduces installation costs. It can be used in orchards, vineyards, nurseries, over containers, and buried in fields for subsurface applications.

**Stock Flow:** 0.53 GPH per emitter.

## GREENHOUSE TOMATO TRELLIS

Galvanized steel

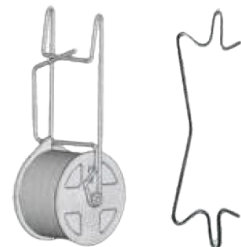

Are you tired of extending tomato stakes when your plants outgrow them? This is a labor-saving device for trellis greenhouse tomatoes. Designed with determinate tomato plants in mind, especially grafted plants or varieties that grow too tall for tomato stakes. It will only work with greenhouses that have crossties on each arch. To install:

Run a purlin pipe the length of the row (over top of the crossties), then hang these trellises between every other plant. Brace first and last trellis (see picture for brace idea). Then, install tomato twine as needed to support the growing plants. Installing twine is easy, even once the plants are 5-plus feet tall. Cut as needed to fit structure heights. For taller structures, you may need to use short stakes for the first row or two of twine.

ITEM	DESCRIPTION	PRICE
13742	98" Long, 12 hooks	\$9.95
14208	108" Long, 12 hooks	\$10.35

## GREENHOUSE TOMATO TRELLISING HOOKS

For trellising greenhouse tomatoes and cucumbers, etc. Hang on a high wire. Or use S-hooks to hang from a pipe.

**Twine Hook:** Wire hook releases approximately 7" of twine each time they are turned over; the 11976 includes 30 ft. of UV-resistant white twine prewrapped on the hook and 10 ft. loose, so it can free-fall out of the case to speed installation.

**Roller Hook:** A labor-saving device to lower/lean crops smoothly controlled. Heavy-gauge wire frame supports a spool of twine with 100' of UV-resistant white twine. It easily clips over the wire. Concurrently releases twine while sliding down the wire to lower and lean trellised crops.

# ELLEPOT

GROW SMARTER

## A SMARTER WAY TO PROPAGATE!

Ellepot is an environmentally friendly growing system that helps to grow more extensive and all-natural roots, creating high-quality plants and eliminating the need for plastic. Ellepots are permeable root, air, and water and made from environmentally friendly paper, which degrades naturally and will not harm the environment. This ensures natural and fast root development, producing the highest quality plants. Finally, the Ellepot system helps reduce logistics and labor costs through easier and faster transplanting, eliminates transplant shock, and increases plant quality, health, and structure.

### BENEFITS:

- Faster and healthier root development
- Higher yield per plant
- Faster transplanting and handling
- Grow greener by eliminating plastic pots and bags in propagation

GROWER SOLUTIONS

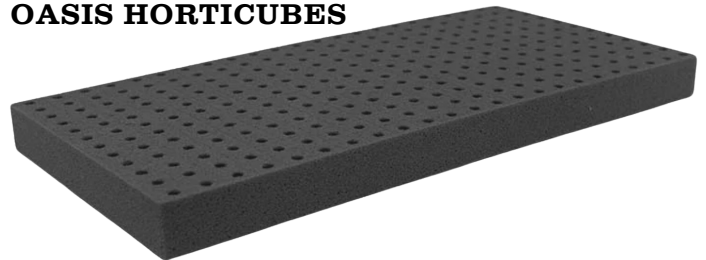

### OASIS ROOTCUBE

Rootcubes® growing medium is a pathogen-free hydrophilic foam that encourages plant growth and rapid root development in cutting propagation. It has a balanced ratio of air and water, contains starter nutrients, and is an economical propagation media. With low cation exchange capacity, it allows for rapid nutrient availability without salt accumulation and helps reduce disease and insect problems.

General-purpose high-quality plug mix for unmatched uniformity during seed germination and seedling production. Optimized aeration and water retention, reduced weight for increased volume per shipment.

## BM6 HP

ITEM	DESCRIPTION	PRICE
15219	3.8 cu ft, bale	\$27.95

This high perlite version of BM6 is designed to provide superior aeration and drainage. This is a general use mix.

## BM4 - SOILESS W/ WOOD FIBER

ITEM	DESCRIPTION	PRICE
2751	3.8 cu ft, bale	\$26.95

A blend of Canadian sphagnum peat moss and eco-friendly NF Wood, this matrix of fibers creates a unique connective network offering high water retention and ample air space for rapid root development. Great for containers.

## BM7 COARSE BARK

ITEM	DESCRIPTION	PRICE
2879	3.0 cu ft, loose	\$26.95
3006	3.8 cu ft, bale, COARSE	\$29.75

The regular BM7 is an all-purpose bark mix providing additional weight and a balanced air to water ration. The COARSE bark mix is a combination of Canadian Sphagnum peat moss, coarse bark and perlite creating ideal aeration and porosity - all while providing additional weight for the anchor. Both are well adapted for medium to large containers when extra weight is required.

## BM6 GENERAL PURPOSE (PERLITE ONLY)

The classic peat perlite growing media is manufactured exclusively with superior ingredients under stringent quality control specifications. Provides good drainage, maintains a moderate water content between irrigations, and contains carefully sieved horticultural perlite.

ITEM	DESCRIPTION	PRICE
2880	3 cu ft, loose	\$12.50
2593	3.8 cu ft, bale	\$21.95

## BM8

ITEM	DESCRIPTION	PRICE
4214	3.8 cu ft, bale	\$28.95

This mix is specifically designed to lengthen the dry-down period. The extra water reserve is great for maintaining moisture level in hanging baskets and large containers. For use in multiple green-house crops from medium to large containers.

**Rice Hulls**, an OMRI Listed amendment, serves as a multi-use replacement for perlite in greenhoused nurseries. It is less dusty and improves weed control as a top dress.

**Vermiculite** enhances soil aeration and retains moisture and nutrients for faster plant growth. It also has cation exchange properties that can hold and provide essential nutrients to plants. Vermiculite is lightweight, easy to handle, and mixes well with various organic materials, fertilizers, pesticides, and herbicides.

**Perlite** is a volcanic mineral that expands significantly when heated and becomes a sterile, pH-neutral, and disease-free material with a large surface area that can hold moisture and nutrients for plant roots.

## BIOGAURD BIODEGRADABLE MULCH FILM

100% Biodegradable and compostable mulch film. Made of Mater-Bi, a starch based material. Novamont produces Mater-Bi with renewable resources such as starches from different non-GMO crops: corn & other cereals, potatoes and vegetable oils. Mater-Bi complies with international biodegradation and environmental standards, such as EN 13432 by Vinçotte and ASTM D6400 by BPI, which guarantee complete degradation in soil without any toxic residues. Not OMRI listed due to carbon black.

The degradation rate depends on film thickness, climate, and soil type. Starts breaking approximately 4-5 months on .6 mil, and 5-6 months on .8 mil. The manufacturer does not guarantee the film's life span due to different conditions such as non-compliance with laying and usage conditions, climatic conditions, etc. Lay relatively loose, and after a few hours or by the next day the mulch tightens and clings to the soil bed.

## BIO-GAURD

A bio-degradable plastic mulch that lays like a standard film. No special laying or storage instructions; it relies on microbes in the soil to bio-degrade. Takes longer to break down. Disc into soil after season.

## ECO-ONE OXO-DEGRADABLE

Environmentally sound degradation. Laboratory studies indicate that this degradable plastic breaks down into CO<sub>2</sub>, H<sub>2</sub>O, and biomass without toxic residues. Degrades fully both above and below soil. Avoid excessive tension when laying and plant immediately after laying.

Liability from the manufacturer is limited to product defects to the extent of the value of the film. The breakdown period can vary depending on the conditions. **This film will break down faster in direct sunlight.** We primarily recommend this film for crops where the foliage is casting shade over the film, such as vine crops.

## CLEAR ECO-ONE FOR SWEET CORN

If you grow sweet corn under plastic, here's an option you don't want to miss. About 30-40 days after planting, or when the corn is 4-6 inches high, the plastic should start breaking up. You may have to slit it, depending on the weather. The advantage is that if the corn gets too high, you slit it and let it lay. At that point it keeps on putting heat in the soil.

## WHITE ON BLACK WOVEN GROUND COVER

**3.8 oz./sq. Yd. Turn white up to reflect the sun and heat.**

For applications where cooler soil & sunlight reflection is preferred. Very similar to our black woven ground cover, except stronger, and this product has white and black strands interwoven. Mostly white on one side and mostly black on the opposite side.

The black Underside is an effective weed blocker & prevents weed seed from germinating, unlike the all-white product we used to handle.

*Upon request, we can still get 3.2 oz. white.*
