POULTRY MANURE-BASED ORGANIC FERTILIZERS

WHY POULTRY MANURE FERTILIZER?

Rich with high levels of macronutrients, nutrients (N-P-K) and crucial micronutrients, chicken manure-based fertilizers are a great comprehensive alternative to chemical fertilizers that safely improve the health of your lawn and garden soil.

By helping to improve overall soil structure, moisture retention and air circulation; it can be viewed not only as a highly effective fertilizer and plant food, but also as a very beneficial soil amendment.

Thank You for Shopping Progressive Grower!

We recommend that you place your orders at least two weeks prior to the pickup or shipping date. This timeframe allows us sufficient time to process and pack your order. Please note that we reserve the right to adjust quantities for items that are in short supply. Orders must be picked up within one month of placing them; any orders left unclaimed after 30 days will be subject to available inventory and pricing.

Upon receiving your order, please inspect it right away and report any errors, shortages, or damages within three days. Progressive Grower cannot be held responsible for shortages reported beyond this three-day period.

Returns:

- Saleable products may be returned with prior authorization and may incur handling charges depending on their condition and the timing of the return, particularly for seasonal items.
- Please note that expired products, fertilizers, seeds, special orders, and non-stock items are non-returnable.

Credit Invoices:

In cases of overpayments, cancellations, shortages, returns, or defective products, credit invoices will be issued. Any unused credit invoices will be mailed out on an annual basis.

All prices are FOB West Wareham, MA (unless otherwise specified) and are subject to change without prior notice.

TERMS

Credit Card or Check in Advance.

SHIPPING OPTIONS

We provide delivery right to your location! Depending on your area, we can utilize a flatbed truck with a forklift, a box truck, or a pickup truck for your convenience. When placing your order, please let us know which option works best for you!

Alternative choices encompass a range of shipping methods available through LTL, FedEx, UPS, or USPS.

We also offer UPS Next Day Air and other expedited shipping options. When Shipping LTL motor freight we compare prices among numerous carriers to find the best rates. Progressive Grower trucks deliver in New England and New York. We will ship your order in the most economical way possible.

Prices in this catalog are subject to change without notice. We are not responsible for typos.

A Letter to Our Customers

We sincerely value your business and hope our service aligns with your expectations. Since 2020, our industry has faced numerous challenges. Looking ahead to 2027, we anticipate that fertilizer prices will continue to rise, alongside many of your essential supplies.

We encourage you to utilize this catalog as a reference for your orders, keeping in mind that stock availability is constantly changing and prices may fluctuate without prior notice. As always, we kindly ask for as much advance notice as possible to prepare your orders and schedule deliveries. To secure the best pricing, we recommend placing your orders before the year ends.

If you have any inquiries regarding inventory or pricing, please feel free to reach out to us at 508-273-7358 or info@progressivegrower.com.

Warm regards,
The Progressive Grower Team

Solu-Cal

Give Your Soil the Boost It's Been Waiting For

Fast-Acting Calcium for Healthier, More Resilient Soil

Give your plants the calcium they need, along with steady pH correction in as little as 6 - 8 weeks. Every **Solu-Cal Enhanced Calcium & Gypsum product** is powered by INTENSIFY, a microbial biocatalyst featuring nine beneficial strains that help roots take up more nutrients and stay productive through the season. Make every application more efficient with a boost from Solu-Cal!

- Fast-acting calcium for healthier growth
- Reliable pH adjustment without the long wait
- INTENSIFY Biological for better nutrient availability
- Fewer applications - use much less than conventional granular products...with better results

Perfect for organic growers, landscapers, golf and sports turf, wildlife food plots, and specialty crops.

ORGANIC PRODUCTS

8-2-2

Crafted from a blend of composted poultry manure and Feather Meal, this product is an excellent choice for new turf, established lawns, and vegetable crops. With an **8% Nitrogen** content, **2% Phosphate**, and **2% Soluble Potash**, it delivers a well-rounded nutrient profile. This mixture is especially advantageous for soils high in Phosphate, offering a slow-release source of nitrogen.

ITEM	DESCRIPTION	PRICE
3553	50 LB BAG	\$29.95
3568	2000 LB BULK BAG	\$1,095.00

5-4-3 WITH 9% CALCIUM

Composed of composted poultry manure, pelleted compost is best used as an initial application in the planter or as an additional side dressing for vegetables. One of the benefits of pelleted compost is its smooth flow through drop spreaders, enhancing ease of use.

ITEM	DESCRIPTION	PRICE
16458	25 LB BAG	\$9.95
13785	40 LB BAG	\$14.85
4641	2000 LB BULK BAG	\$550.00

5-4-3 SUNRISE WITH 9% CALCIUM

Made from composted poultry manure, this pelleted compost contains elevated levels of calcium. It is ideally used as a starter in planters or as a side dressing for vegetables. One of the key advantages of pelleted compost is its ability to flow effortlessly through drop spreaders.

ITEM	DESCRIPTION	PRICE
3569	50 LB Bag	\$18.50

4-3-10

This fertilizer, made from composted poultry manure and **OMRI-listed Sulfate of Potash**, is an outstanding choice for starting corn crops. Its versatility allows for application on a wide range of plants, including vegetables, trees, shrubs, and flowers. With a nutrient profile of **4% Nitrogen**, **3% Phosphate**, and **10% Soluble Potash**, it provides a well-rounded mix essential for robust plant growth.

ITEM	DESCRIPTION	PRICE
3525	50 LB BAG	\$23.50

FISH FERTILIZER 2-4-1

A distinctive cold process naturally preserves the heat-sensitive nutrients found in fish, delivering the finest fertilizer possible! We are committed to producing the highest quality fish hydrolysate, which is why our liquid fish incorporates a range of dock-fresh North Atlantic fish. Unlike fish emulsions, Neptune's Harvest retains the proteins and oils during processing, ensuring there are no unpleasant odors. **OMRI LISTED.**

WATER WHEEL TRANSPLANTERS

Water Wheel Transplanters glide over a finished plastic mulch bed, functioning effectively in both raised and flatbed applications. The planting wheel punctures the soil and thoroughly waters the hole, enabling operators to comfortably position themselves while placing a plug, potted, or bare-root plant directly into the moistened hole. This method ensures that plant mortality remains exceptionally low.

The Floating Water Wheel Bracket supports up to three rows of plants per bed, with one to two being standard. There is an option for three-wheel plumbing to accommodate three rows. Standard racks can carry a total of 19 standard 1020 trays, and this capacity increases to 25 trays with an optional second top rack. The bracket features fully adjustable, comfortable high-back cushioned seats complete with footrests, enhancing operator efficiency. The tank is equipped with a shut-off valve that is easily accessible by the planter personnel, and the water flow into the planter wheels can be adjusted independently.

COMPACT DESIGN allows closer row centers, shorter turns & increases water & tray carrying capacities of a smaller tractor.

Model P1500

Pull-type with large transport wheels. It converts easily to a 3-point hookup by pulling 3 pins and dropping the hitch. Has an adjustable turnbuckle on the hitch for easy leveling. Used tires with new rims. Steel wheels are optional. 150 gallon tank.

FLATBED MULCH LAYER

**13748 - Model SL43 with - 13749
Optional Drip Attachment**

**15847 - Model SL5450 Combination
Sweet Corn Model**

TOP OF THE LINE SUPER DELUXE MULCH LAYERS

Heavy-duty spring-loaded drag gives a smooth, pressed seed bed and eliminates potholes. Furrow openers on the bottom of the drag give a consistent depth furrow and can't be pushed out of line by rocks.

High-speed dirt shields. Drag is easy to remove for laying clear plastic over the top of planted sweet corn or raised beds.

The adjustable spring tension on a plastic roll, 3" roller, and 16" rubber tire press wheels keep plastic under constant pressure resulting in uniform and tightly laid mulch.

The cover disks are independently spring-loaded and are fully adjustable. Extra roll carrier enables the machine to carry 2-4000' roll of plastic mulch

COMBINATION MODEL

Pull type with large transport wheels converts easily to 3 Pt Hookup by pulling 3 pins and removing the hitch. Spring-assisted lever makes it easy to raise and lower the machine by hand when using it as a pull type. With used rubber tires and new rims. *Steel transport wheels are optional for additional \$65.00*

ALUMINUM HARVEST CONVEYOR

Aluminum conveyor designed for harvesting vegetables. Including, but not limited to: Melons, Sweet Corn, Pumpkins, Broccoli, Cabbage, and Cauliflower. These features make this conveyor great for the grower that loads directly out of the field!

- Great for packing bins, boxes, or loose on the wagon
- Mounts right or left and anywhere from front to rear on a regular farm wagon
- The stand is 16" high and sits on one edge of the wagon. Opposite end clamps to the wagon with a c-clamp attached to a pulley
- **AHC28** has a 3½' long receiving and grading table. 10" wide picking belt with cleats on every foot. The belt travels approximately 50' per minute with the tractor at idle. It has a bypass valve and plumbing to stop or slow the belt
- The bottom belt return track with UHMW strips is standard
- Easily put on or taken off
- **AHC28** includes a slow-speed high torque hydraulic motor with two 20' long ¾" hydraulic hoses
- Painted aluminum side prevents discoloration of produce upon contact with the side

Brusher

Optional Equipment:

- **DROP LID** - Removable lid in receiving tables allows produce to fall directly into crates, boxes or bins
- **Standard Cable Winch**: This feature makes it easy for one person to adjust the heights as needed due to uneven terrain, etc.
- Battery or Honda Engine

KOOL RAY CLASSIC SHADE, 1 GALLON

Concentrated liquid shade. The common dilution rate is 1 part to 8 parts water, which reduces light transmission by 31%. A 1:3 ratio reduces light by 45%. A 1:1 ratio reduces glare by 65%. One gallon of solution covers 175 sq. ft. Can be applied by brush, roller, or spray, but works best when spray is applied. Usually applied in spring or summer, then during the course of the year, the shading will slowly wear off for increased light levels as the daylight increases. Frost will also loosen shade. Keep product from freezing.

LED GROW LIGHTS

These LED grow lights are designed for supplemental light *(not intended to be able to grow plants without the aid of sunshine)*. Standalone design, no fixture needed, these LED tube lights are easy to install with included hardware.

- No wiring needed when using our integrated cords. Daisy chain up to 2 lights (96 watts). ***You can daisy chain more, but that voids warranty.***
- Energy Saving:** Uses less energy and produce less heat than full spectrum lights. 100% of the power input is used for your plant chlorophyll production.
- These lights have special red & blue mixing LED bulbs. 3 parts red for every 2 parts blue. Different color light helps plants achieve different goals. The blue light helps encourage vegetative leaf growth. Red light, when combined with blue, allows plants to flower.

GREENHOUSE BENCHES

We have partnered with **Nolt's Greenhouse Supply** to offer you a complete top notch heavy duty greenhouse bench, or you can use their components to create your own.

A heavy-duty galvanized square tubing frame with reinforced smooth corners, SS fasteners, and A-V plastic bench tops (above) makes this bench exceptionally durable. Plastic bench tops prevent the growth of mold and funguses. For shipping/transport purposes, we sell benches without legs. Use the leg kits below, or for easy-to-stow benches use cement blocks.

GREENHOUSE SUPPLIES

DRAMM® MINI AUTO FOG™

The **Dramm Mini AutoFog** is a low-volume chemical applicator designed for smaller greenhouses. It can automatically treat 5,000 sq. ft. with a highly concentrated spray solution, using a specially designed nozzle to generate micro-particles that ensure complete and even coverage of plant surfaces. This method reduces run-off and the amount of chemicals needed. It features a 24-hour timer, durable oilless compressor, and mechanical agitation to keep chemicals in suspension.

Standard Treatment Area: Up to 5,000 sq. Ft. (7,000 sq. ft. with circulation fans)

Nozzle: Air atomizing, outputs 8 liters in 4 hours

Adjustable Nozzle Height: 5-7'

Tank Size: 8 Liters (8.45 quarts)

ITEM	DESCRIPTION	PRICE
15760	110 Volt Mini AutoFog with SS Nozzle	\$4,685.00

FOGIT GREENHOUSE SPRAYER

The **Fogit Sprayer** is an easy-to-use, low-volume chemical applicator designed with smaller greenhouses in mind. It can easily apply various chemical formulations using a highly concentrated spray solution. The nozzle generates micro-particles that fill the entire treatment area and ensure complete and even coverage of all plant surfaces. This method of applying chemical solutions eliminates costly run-off and reduces the amount of chemical.

Standard Treatment Area: Up to 5,000 sq. Ft. (7,000 sq. ft. with circulation fans).

Tank Size: approx. 7 Liters (7.4 quarts)

Compressor Required: CFM at 25 PSI (9 CFM for dual head)

Now Standard with stainless steel head(s) and larger tank

15772	Fogit Greenhouse Sprayer, Double Nozzle	\$625.00

DRAMM® K-10 PORTABLE PULSFOG®

Perfect for the application of insecticides, fungicides, and disinfectants.

Propels chemical: 45' with **NutriFog**, 100' with VK-1 (more with the help of circulation fans)

PULSFOG® DILUENT SOLUTIONS best results; the **PulsFOG** requires carrier solutions or fog enhancers. These solutions help to create a more even particle size, distribute the solution throughout the area, and retard the evaporation of fog droplets. Some chemicals may not require additional carrier solutions due to their formulation.

Check with your chemical supplier for more in-depth information.

ITEM	DESCRIPTION	PRICE

GREENHOUSE SUPPLIES

AGRITAPE HEAT MAT SYSTEM

The Agritape system includes a control unit, Agritape Heat Mat, and grounding screen that regulates soil temperature and safely grounds the current if the tape is damaged. The system doesn't work with GFCI outlets and uses black bars to create a continuous heat pattern. To install, place the mat and cover it with the ground screen, connect the ground wire from the control unit to the screen, and put the sensor in the soil of the seed tray or container. The Agritape can increase soil temperature up to 20°F above room temperature.

Control Units: Multi-outlet power strips can be used to add mats to a controller, however, DO NOT exceed amp rating or max amp of tape.

ITEM	DESCRIPTION	PRICE
11150	Digital Control, 1 outlet, digital thermostat. Max: 50 sq. ft. of heat mats. Rated 8.5 amps.	\$49.95

MIXRITE PROPORTIONAL INJECTORS, 11 GPM

This fixed ratio 1:100 offers an alternative to the Chemilizer with similar specifications. This proportional fertilizer injector automatically compensates for any change in water pressure or flow to provide a constant mix at 1:100 rate. **Standard pump:** fixed ratio 1:100. **Flow Rate:** 10.2-660 gph (0.17-11 gpm) **Operating Pressure:** 6-120 psi.

Connections: " male thread.

Also available upon request: 22 GPM, 45 GPM and 110 GPM units.

MixRite

TF-5 MixRite is a low to medium flow unit used for fertilizers, pesticides and other additives for farming and irrigation. Not intended for strong acids and alkalis or solvents. Flow rates of .88 - 22 GPM. The TF-5 has 1" MPT inlet/outlet connections. Providing higher flow rates, less friction loss and longer life than comparable models.

TF-10 MixRite are designed for medium water flow for fertigation, pesticide, and other in-line additives. They are intended for typical fertilizers, pesticides, and agriculture or irrigation additives. Flow rates of 2 – 45 GPM. The TF-10 has 1.5" NPT threaded connections for in-line mounting. They are not designed for strong acids, alkalis, or solvents.

CHEMILIZER PROPORTIONAL INJECTOR, 11 GPM

The advantage of this unit is that the chemical pump takes all the abuse of the chemicals and is disassembled easily or can replace by hand. Parts are inexpensive. The water-powered motor is protected, ensuring chemicals never contaminate it. A 2-year warranty is included for added peace of mind. This proportional fertilizer injector automatically compensates for any change in water pressure or flow, providing a constant mix at a 1:100 rate.

Max Temperature: 100° F

Standard pump: fixed ratio 1:100.

Flow Rate: 1.2-660 gph (0.02-11 gpm)

Operating Pressure: 3- 85 psi.

Connections: 3/4" male hose thread.

DOSMATIC SUPERDOS 45 FERTILIZER INJECTORS

SuperDos operates without electricity to precisely inject liquid concentrates into a water supply line using fluid flow as the power source. SuperDos is designed with a patented internal mixing chamber that promotes homogeneous mixing while segregating harsh chemicals from critical internal components. These proportional fertilizer injectors automatically compensate for any change in water pressure or flow and provide a constant mix at the rate you set. Replacement parts available for ordering.

TROUBLE FREE INJECTION OF FERTILIZERS

Mazzei injectors are high-efficiency, Venturi-type differential pressure injectors. A pressure difference between the inlet and the outlet of the injector creates a vacuum inside the body, which results in a suction through the suction port. The suction can then be used to inject and mix fertilizers and water treatment chemicals into the water. Mazzei injectors are trouble free because there are no moving parts, and have a long life since they are molded from chemical resistant polypropylene.

Mazzei non-proportional injectors are excellent for drip systems in fields or high tunnels, provided that fertilizer is based on rate/acre rather than PPM (constant feed). Take lb./Acre per week divided by number of applications for the week and mix it in with approx. 5 gallons of water

Operating Instructions: Mix and re-mix required fertilizer for irrigation cycle, start irrigation, allow pressure to stabilize in system, open the two PVC bypass valves and slowly close the brass mainline valve until the flow meter rises to the desired injection rate (GPH). Water pressure will drop 3-7 PSI dependent on flow and injection rate. When fertilizer container is empty it will draw air, but that is not harmful. Allow irrigation to operate for a while to ensure fertilizer is all out of the system.

Injector unit with bypass mainline, 8' suction hose, (GPH) flow meter, back flow check valve, bypass valves, pressure gauge and brass gate valve to control injection rate (normally open).

BLUELINE® PC PRESSURE COMPENSATING DRIPLINE

18MM (½") Orchard Tubing with Built-In Emitters

BlueLine™ PC is a tubing system that features a built-in emitter welded to the inside wall of the tubing, providing constant discharge over a pressure range of 15-60 PSI. This one-piece construction eliminates the need for hole punching and handling damage, reduces installation costs. It can be used in orchards, vineyards, nurseries, over containers, and buried in fields for subsurface applications.

Stock Flow: 0.53 GPH per emitter.

DRIP TAPE

FLOW CONTROL PRESSURE COMPENSATING DRIP TAPE

Toro Aqua-Traxx Flow Control gives you uniform output regardless of pressure changes caused by hilly terrain and long runs. Control how much water your plants receive by increasing or decreasing the operating pressure, 10-25 PSI. For uniform output you need 8-10 PSI at the highest point of the field. Multiple laser slit outlet reduces startup clogging & impedes root intrusion. 150 mesh filtration required.

Installation Recommendations

- One fogger should be used for every 2.5 square feet. The cross with four foggers will cover up to 10 square feet (3 – 4 feet wide).
- Foggers should be installed at a height of 3 – 5 feet above the propagation material.
- The spacing between the fogger assemblies should be 3 feet. Multiple flow rates available for different precipitation rates.
- **3'-4' Bench:** One line above the center.
- **6'-7' Bench:** Two lines with crosses are required.
- To prevent dry edges on a single bench (no other benches within 2') the cross should not be further than 1' from the edge. In some instances two lines may be required on a 4' bench.

SENNINGER® XCEL-WOBBLERS

The Xcel-Wobbler uses Senninger's off center rotary-action technology. It provides an extremely uniform and instantaneous application pattern over a large area at lower pressures, and with very low evaporative loss and wind drift. Wobblers are designed for nursery irrigation and frost protection. Wobblers installed in test bed withstood winds up to 25 MPH and temperatures as low as 18°. They are an excellent sprinkler for small diameters from 35 to 56 feet. The Xcel has less vibration than earlier models.

Connection: 1/2" MPT. **Operating Pressures:** 10 - 25 PSI. Space and stagger these sprinklers at 30% less than listed dia. for uniform coverage.

GREENHOUSE TOMATO TRELLIS

Galvanized steel

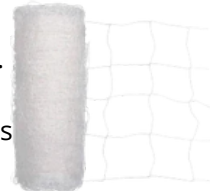

Are you tired of extending tomato stakes when your plants outgrow them? This is a labor-saving device for trellis greenhouse tomatoes. Designed with determinate tomato plants in mind, especially grafted plants or varieties that grow too tall for tomato stakes. It will only work with greenhouses that have crossties on each arch. To install: Run a purlin pipe the length of the row (over top of the crossties), then hang these trellises between every other plant. Brace first and last trellis (see picture for brace idea). Then, install tomato twine as needed to support the growing plants. Installing twine is easy, even once the plants are 5-plus feet tall. Cut as needed to fit structure heights. For taller structures, you may need to use short stakes for the first row or two of twine.

GREENHOUSE TOMATO TRELLISING HOOKS

For trellising greenhouse tomatoes and cucumbers, etc. Hang on a high wire. Or use S-hooks to hang from a pipe.

Twine Hook: Wire hook releases approximately 7" of twine each time they are turned over; the 11976 includes 30 ft. of UV-resistant white twine prewrapped on the hook and 10 ft. loose, so it can free-fall out of the case to speed installation.

Roller Hook: A labor-saving device to lower/lean crops smoothly controlled. Heavy-gauge wire frame supports a spool of twine with 100' of UV-resistant white twine. It easily clips over the wire. Concurrently releases twine while sliding down the wire to lower and lean trellised crops.

Vermiculite improves soil aeration while retaining moisture and nutrients, promoting quicker plant growth. It possesses cation exchange capabilities, allowing it to hold and supply essential nutrients to plants. Additionally, vermiculite is lightweight, easy to manage, and blends effortlessly with a variety of organic materials, fertilizers, pesticides, and herbicides. **Perlite** is a volcanic mineral that expands greatly when exposed to heat, transforming into a sterile, pH-neutral, and disease-free substance. Its large surface area allows it to retain moisture and nutrients, making it ideal for supporting plant roots.

EMBOSSED MULCH BLACK & CLEAR

This is a reinforced and highly durable embossed mulch that blocks weeds and prevents soil from coming into direct contact with fruit and fresh vegetables.

- Reinforced and tough to resist tearing.
- It can be laid at higher speeds.
- UV Stabilized, designed to last the duration of your growing season.
- Stretches very well and hugs tight to the bed.
- Works with practically all crop varieties.

PLASTIC MULCH/GROUND COVER

BIOGUARD BIODEGRADABLE MULCH FILM

100% Biodegradable and compostable mulch film. Made of Mater-Bi, a starch based material. Novamont produces Mater-Bi with renewable resources such as starches from different non-GMO crops: corn & other cereals, potatoes and vegetable oils. Mater-Bi complies with international biodegradation and environmental standards, such as EN 13432 by Vincotte and ASTM D6400 by BPI, which guarantee complete degradation in soil without any toxic residues. Not OMRI listed due to carbon black.

The degradation rate depends on film thickness, climate, and soil type. Starts breaking approximately 4-5 months on .6 mil, and 5-6 months on .8 mil. The manufacturer does not guarantee the film's life span due to different conditions such as non-compliance with laying and usage conditions, climatic conditions, etc. Lay relatively loose, and after a few hours or by the next day the mulch tightens and clings to the soil bed.

WHITE ON BLACK WOVEN GROUND COVER

3.8 oz./sq. Yd. Turn white up to reflect the sun and heat.

For applications requiring cooler soil and enhanced sunlight reflection, this product is ideal. It closely resembles our black woven ground cover but boasts superior strength, featuring interwoven white and black strands. One side predominantly exhibits white strands while the reverse side primarily showcases black strands.

The black underside serves as an efficient weed blocker, inhibiting the germination of weed seeds, unlike the all-white product previously utilized.

Upon request, we can still get 3.2 oz. white.
